1- In MySQL(Workbench), create the following tables:

Student_Mast (| Student_Id | Name | St_Class)

Stu_Log (| User_Id | Description) -- User_Id is the current user → User().

2- In MySQL (Workbench), insert data into Student_Mast table.

STUDENT_ID	NAME	ST_CLASS

Let we promote all the students in next class i.e. 7 will be 8, 8 will be 9 and so on. After updating a single row in student_mast table a new row will be inserted in stu_log table where we will store the current user id and a small description regarding the current update:

user_id	description

root@localhost	Update Student Record Neena Kochhar Previous Class :8 Present Class 9
root@localhost	Update Student Record Lex De Haan Previous Class :8 Present Class 9
